

Delivery plan sprint 1

Date	18/10/2022
Team ID	PNT2022TMID18932
Project Title	IOT based safety gadget for child safety monitoring & Notifications
Maximum Mark	2Marks

Live Location Tracking:

GPS is installed on gadget to track its current location can be tracked on android app and via SMS request sent from parent phone to safety gadget. Outputs of live location tracking.

Stay Connected Feature:

Stay connected feature is used to trigger call and predefined SMS anytime from gadget to parental phone by just pressing a button and parent can make SMS and call to the gadget anytime.

Gadget Plugged or Unplugged Monitoring:

Gadget plug or unplugged is monitored using contact switch installed on smart gadget, as soon as the device is unplugged, an alert is provided to parent phone via SMS, and it is also updated to cloud for app monitoring.

Panic Alert Systems:

Panic alert system on gadget is triggered during panic situation, automatic call and SMS are triggered to parental phone. The alert is also updated to the cloud for app monitoring. Outputs of panic alert system.

Boundary monitoring system:

This is used to track the safety gadget using the binding gadget by implementing signal strength concept as soon as the safety gadget moves far away from the BLE listener gadget then an alert is provided to itself. Listener device and broad cast device.

Health Monitoring System:

Health monitoring systems are used using heartbeat sensors, temperature sensor updated to the cloud and can be monitored via app. The current value of sensors can be obtained using SMS requests sent to gadget from parent phone. Outputs of health monitoring system.
