

IBM ASSIGNMENT 4

Ultrasonic sensor simulation in Wokwi

NAME : Jenifer.R

COLLEGE: Sona College of Technology

Question :

Write a code and connections in wokwi for the ultrasonic sensor. Whenever the distance is less than 100cms send an “Alert” to IBM cloud and display in the device recent events.

Code:

```
#include <WiFi.h> #include <PubSubClient.h> void callback(char* subscribetopic,
byte* payload, unsigned int payloadLength);
//-----credentials of IBM Accounts-----
#define ORG "kotoq5"//IBM ORGANITION ID
#define DEVICE_TYPE "ESP32"//Device type mentioned in ibm watson IOT Platform
#define DEVICE_ID "12345"//Device ID mentioned in ibm watson IOT Platform
#define TOKEN "12345678" //Token String data3; char server[] = ORG
".messaging.internetofthings.ibmcloud.com"; char publishTopic[] = "iot-
2/evt/Data/fmt/json"; char subscribetopic[] = "iot-2/cmd/test/fmt/String"; char
authMethod[] = "use-token-auth";
char token[] = TOKEN;
char clientId[] = "d:" ORG ":" DEVICE_TYPE ":" DEVICE_ID;
WiFiClient wifiClient;
```

```
PubSubClient client(server, 1883, callback ,wifiClient); const int trigPin =
5; const int echoPin = 18; #define SOUND_SPEED 0.034 long duration;
float distance; void setup() { Serial.begin(115200); pinMode(trigPin,
OUTPUT); pinMode(echoPin, INPUT); wifiConnect(); mqttConnect();
} void loop() { digitalWrite(trigPin, LOW);
delayMicroseconds(2);    digitalWrite(trigPin,
HIGH);
delayMicroseconds(10);
digitalWrite(trigPin, LOW); duration =
pulseIn(echoPin, HIGH); distance = duration *
SOUND_SPEED/2;
Serial.print("Distance (cm): "); Serial.println(distance);
if(distance<100)
{
Serial.println("ALERT!!"); delay(1000);
```

```

PublishData(distance);
delay(1000); if
(!client.loop()) {
  mqttconnect();
} } delay(1000); } void
PublishData(float dist) { mqttconnect();
String payload = "{\"Distance\":"; payload += dist; payload +=
",\"ALERT!!\":"; payload += "\"Distance less than 100cms\""; payload += "}";
Serial.print("Sending payload: "); Serial.println(payload);

if (client.publish(publishTopic, (char*) payload.c_str())) {
  Serial.println("Publish ok");
} else {
  Serial.println("Publish failed");
} } void mqttconnect() { if
(!client.connected()) {
  Serial.print("Reconnecting client to "); Serial.println(server);
  while (!client.connect(clientId, authMethod, token)) { Serial.print(".");
  delay(500);
}
}
initManagedDevice();
Serial.println();
} }
void wificonnect()
{
  Serial.println(); Serial.print("Connecting to ");
  WiFi.begin("Wokwi-GUEST", "", 6); while (WiFi.status() !=
  WL_CONNECTED) { delay(500);
  Serial.print(".");
}
  Serial.println(""); Serial.println("WiFi connected");
  Serial.println("IP address: ");
  Serial.println(WiFi.localIP());
}
void initManagedDevice() { if
(client.subscribe(subscribetopic)) {
  Serial.println(subscribetopic); Serial.println("subscribe to cmd OK");
} else {

```

```

Serial.println("subscribe to cmd FAILED");
} } void callback(char* subscribetopic, byte* payload, unsigned int payloadLength)
{
Serial.print("callback    invoked    for    topic:    ");
Serial.println(subscribetopic); for (int i = 0; i <
payloadLength; i++) { //Serial.print((char)payload[i]); data3
+= (char)payload[i];
    }
    Serial.println("data: "+ data3); data3="";
}

```
